PROJECTS

Product Launch Platform (Inspired by Product Hunt)   **Live Link**   **Source Code**

- A full-featured product launch platform inspired by Product Hunt, built using the MERN stack (MongoDB, Express.js, React, Node.js).
- This platform allows users to discover, upvote, review, and discuss the latest tech products. It also features role-based authentication, moderation tools, reporting systems, and search functionality with pagination. Admins can manage products, users, and coupons through a dedicated dashboard.

BlueSky Residences   **Live Link**   **Source Code**

- BlueSky Residences is a modern and user-friendly web platform where users can easily discover and book luxurious apartments and real estate units. The project utilizes React.js and Tailwind CSS for the frontend and Express.js and MongoDB for the backend. Users can filter, search, book, and review available units. An admin dashboard allows full control over bookings and user management.
